WHAT WE DO

Sustain Our Planet is committed to having a positive impact on climate change by enabling our clients to calculate, reduce, and offset their carbon footprint. Our consulting and education services help clients save money and reduce the effect they have on the environment.

We understand every organization is unique. Because of this, we conduct an extensive evaluation of our client's energy usage and green office practices to help them take the appropriate measures to plan, implement, and improve on existing environmental programs.

CONSULTING SERVICES

As part of our green consulting services, Sustain Our Planet is able to:

- Calculate the carbon footprint of your organization
- Conduct a *Green Review* of your company; this includes an on-site audit and a report detailing your company's sustainability score
- Conduct a *Carbon Impact Assessment* for your organization that calculates, tracks, and analyzes your company's carbon footprint over a specified period of time
- Provide a means for your organization to offset its carbon footprint through verified, registered, approved and tracked credits on the carbon market
- Research and evaluate environmental policies and procedures that apply to your organization
- List step-by-step recommendations that describe how your company can improve its carbon footprint
- Provide guidance to management and employees about what a carbon footprint is, why it matters, and how everyone can help improve it
- Provide a portal on your company's internal website that allows your employees to track their personal and/or business carbon footprint
- Provide marketing and advertising assistance to highlight and promote your organization as environmentally responsible and/or carbon neutral
